LETTER OF INTEREST

Strategic Collaboration for Outdoor Target Systems

On behalf of JN International, I am pleased to Offer our Services for providing advanced & State of the Art Outdoor Target Systems and related solutions for your esteemed organization.

With extensive international experience in delivering indoor and outdoor shooting range solutions, JN International has been at the forefront of introducing the latest target systems, training technologies, and range support equipment in the region. Our collaboration with leading international manufacturers ensures that we deliver high-quality, reliable, and field-tested systems tailored to meet operational, training, and environmental requirements.

Attached herewith the Latest Target System technical details, a cost-effective yet high-performance solution designed for tropical climates, offering both pop-up and moving targets with computerized control, hit detection, durability, and ease of operation. These systems have proven highly effective in training exercises for rifles, carbines, machine guns, and pistols, and can be customized to specific training needs.

At JN International, we are committed to:

- Delivering end-to-end solutions, including supply, installation, commissioning, and training.
- Ensuring long-term operational support with after-sales service and spare parts availability.
- Providing cost-efficient yet advanced technologies to enhance training effectiveness.

We would be honored to explore potential collaboration with your organization and look forward to the opportunity to demonstrate how our solutions can meet your training objectives.

Thank you for considering, please feel free to contact us for any further information or to schedule a detailed presentation.

Warm Regards,

Muhammad Naveed Qureshi

Director Business Development

AM-Target System

Low Cost - High Performance

A Portable target system for small arms live firing exercises, applicable for various types of weapons and ammunitions such as rifles, carbines, machine guns, and pistols. The targets are computerized controlled according to pre-defined programs. The system is designed for tropical climate, simple and easy to operate and assemble. Target System is designed, developed, and manufactured in Thailand.

AM20

Wired Pop-up Target

- Electro-mechanical unit to raise and lower target silhouette.
- Hit detection rate up to 1000 counts/minute.
- Operate in 4 configurations: Pop-up, Side-up, Turn, and Swivel.
- Manual or pre-programmed electronics control via simple wiring.
- Specially designed for operations in tropical climate.
- Dust and waterproof casing, IP67.
- Lightweight. Easy to install. Easy to handle.

Approximate dimensions: 46cm x 58cm x 47cm (18" x 23" x 18")

Approximate weight: 25kg. (55lbs.)

AM40

Moving Target

- Steel movable trolley on dual rail made by stainless steel. The trolley is driven by cable and pulleys, with electrical brake.
- Space provided on the trolley to place AM20 or AM24.
- Pre-defined, user-selectable, running speeds from 5 to 30 km/h.
- Manual or pre-programmed electronics control via simple wiring.

Approx. Trolley dimensions: 73cm x 120cm x 15cm (29" x 48" x 6")

Approx. Home unit dimensions: 75cm x 80cm x 60cm (30" x 32" x 24")

Rail width: 65cm (26"). Rail length: 18m (60') or upon request

AM100

Target Control Unit

- Control all operations of all targets, including accessories connected to the system.
- LCD touch screen control panel. Simple and user-friendly.
- Store up to 250 different preset scenarios.
- Control up to 100 pop-up and moving targets of all configurations.
- Control via simple wiring from a distance over 1000 meters.
- Display a selection of presentation time, delay, hit indication (number of hits and delay time), and hit result storing.
- Operate from internal rechargeable batteries, with internal 220V AC adapter and charger.
- A portable, ruggedized case.

Approximate dimensions: 28cm x 38cm x 22cm (11" x 15" x 9")

Approximate weight: 12kg. (26lbs.)

F11 & F12

Plastic Target Boards

- Plastic target silhouette to attach to target mechanisms.
- Made from nontoxic, recyclable, special plastic compound.
- Durable, lightweight and sturdy.
- Withstand strong wind and degradation from exposure to sunlight.

2 standard sizes (F11 & F12) with thickness of 3 mm.

****Can be substituted with paper targets and wooden frames for cost savings.**

For detailed technical specifications, demo inquiries, or tailored configurations, feel free to get in touch with us.
